USB

Murat Erciyas

“Bürotime’in en yeni serisi USB öncelikle ev-ofis ortamları için tasarlanmış ancak çok amaçlı kullanılabilen ve günümüz ihtiyaçlarını karşılayabilecek modüler bir sergileme, depolama sistemidir. USB tasarım gücünü iki dikmeden alır. Bu iki dikme, rafları, dolapları, masaları taşıyabilecek, mekanın şekline uygun düzenleyebilecek kabiliyete sahiptir. Modüler özellikleri, kolay montaj detayları, esnek boyut, malzeme ve düzen seçenekleri, USB’nin ev-ofislerde, üniversite kütüphanelerinde, yurt odaları, genç odaları, halk kütüphaneleri, devlet daireleri, sağlık sektörü, hatta kuaför ve eczane gibi hizmet alanları ile mağaza ve alışveriş merkezlerinde kullanılabilme özelliğine sahiptir.”

Modern tasarımı işlevsellikle birleştiren USB; sağlamlığını zeminden-tavana veya zeminden-duvara sabitlenen iki dikmeden alıyor. İhtiyaca ve mekana göre ayarlanabilen raf aralıklarıyla tamamen açık raf sistemi olarak kullanılabilceği gibi; alt bölümlerine entegre edilebilen dolap, çekmece ve masa tablası eklentileriyle hepsi bir arada çalışma ve depolama sistemine de dönüşebiliyor.

Çalışma ve yaşam alanlarını efektif değerlendirerek yer tasarrufu sağlayan USB; duvar önüne konumlandırılmış bir sergileme-depolama ünitesi ya da iç mekanı bölen ve yarı şeffaf alanlar yaratan bir seperatör olarak da kullanılabilir.

Esnek ölçü, modül ve yerleşim seçenekleri sayesinde, evlerde, ofislerde, bekleme alanlarında, mağazalarda, kütüphanelerde ve bir çok sektörde farklı kullanım senaryolarına cevap veriyor.
