BISTRODERN

Utkan Kızıltuğ - Arif Akıllılar

“In situations that require sharp, rapid, and accurate decisions to be made, a person needs self-confidence. Confidence is a necessary need of the brain, which sets it free, allows ideas for the future to blossom. Designed with this point of view, Bistrodern holds the modern attitude of both the past and the future.”

Having a stylistic power that can make its user feel different, special and important, Bistrodern Meeting Series is quite striking with elaborately thought out details. While it explicitly demonstrates the relationship among the different forms in its foot section, it directly gives out a sense of safe, static stance.

The tipping points that have an important role in such a big table when it comes to statics are hidden with engineering details that are masterfully resolved.
