

# ETERNITY

Fatih Aslantaş

“Throughout human history, in most forms of government, castles have been built on high cliffs. This approach for security purposes also allowed the ability to view and control the city from above. Today, in the buildings known as cliff houses; With the need to create more special and high-level living spaces, we see an architecture that extends forward or upward on a foundation placed on rocks. In the light of this architectural information, we can overlap the words such as “power, grandeur, trust” represented by these structures with the concepts of “infinity without borders” at the same time. In today’s business life, “Infinity Concept” has been emphasized in order to express the position in the best way in the senior executive group furniture work to meet the needs of senior managers of companies.”
