GRID

simple and elegant...

Erdem Keskin

“Designed for mid-level and senior level executive offices, Grid stands out as a collection that reflects the architectural simplicity of its era.”

Despite its slim and plain contours, Grid brings power and prestige to the environment; its wide work area, and the electrification solutions on both of its sides, as well as the functionality offered by the storage areas, it fulfills all of its user's expectations.

Complying with the new generation workspaces with its simple and modern line, and rich color options, Grid offers elegant and comfortable alternatives to senior executives with its stylish storage units that are based on functionality.
